Arena Liquid Liners

Durable & dependable.

Our polyethylene liners are tough, yet flexible and can be configured for your unique materials and applications.

Styles. Arena liquid liners come in a variety of configurations: pillow, fitted and open-top. Our patented Air-Evac® liners offers hands-free operation and low residuals especially with thicker products.

Plys. We can vary the number of bag plys according to your needs. 1,2 and 3 ply bags are available.

Barrier films. A great option for products that are moisture or oxygen sensitive. Liners can be configured with films that will render the exact barrier properties for your application.

Agency. Arena liquid liners meet appropriate agency approvals. All FDA materials are used, and the finished bags meet Kosher, IMS (Intermediate Milk Shipping) and USDA standards.

Certifications. Arena liners are manufactured in a third-party registered facility. The Food Safety Management System is certified to ISO22000:2005 and cGMP and design are certified to PAS223:2011 for the manufacture and provision of food packaging.

Arena liners come with a variety of fittings in sizes, styles and colors that can be custom ordered to meet your company's requirements.
