

## OE^} æ Liquid Liners

# Durable & dependable.

Our polyethylene liners are tough, yet flexible and can be configured for your unique materials and applications.

**Styles.** Arena liquid liners come in a variety of configurations: pillow, fitted and open-top. Our patented Air-Evac® liners offers hands-free operation and low residuals especially with thicker products.

**Plys.** We can vary the number of bag plys according to your needs. 1,2 and 3 ply bags are available.

**Barrier films.** A great option for products that are moisture or oxygen sensitive. Liners can be configured with films that will render the exact barrier properties for your application.

**Agency.** Arena liquid liners meet appropriate agency approvals. All FDA materials are used, and the finished bags meet Kosher, IMS (Intermediate Milk Shipping) and USDA standards.

**Certifications.** Arena liners are manufactured in a third-party registered facility. The Food Safety Management System is certified to ISO22000:2005 and cGMP and design are certified to PAS223:2011 for the manufacture and provision of food packaging.

Arena liners come with a variety of fittings in sizes, styles and colors that can be custom ordered to meet your company's requirements.

## Liquid Liners

# From start to finish in under 60 seconds.

The Arena Drop-In Liner Cassette System makes set-up and operation a one-person task that goes from start to finish in less than one minute. No liner system is faster, more efficient and easier to use.

- Simply unfold cassette, attach the fill hose, and drop the cassette into the bottom of the shipper.
- Lock the bottom drain fitting into place.
- Start the product flow. Cassette fills evenly and consistently from bottom up.
- When the tote is full, cardboard cassette may be left in place or it can be removed.
- Attach the lid and the Arena 330 Shipper is ready to be placed in storage or loaded for transit.
