

Arena 330 Shipper™ System Safety Benefits

Different. Better. Safer.

- The skid pads make moving or sliding the empty tote easy for an operator without excessive strain or risk of injury.
- Simple tote set-up, a one-man job.
 - No sharp tools needed
 - No loose parts to trip over
- All plastic design eliminates rust and bending that reduces container strength.
- The tote is manufactured using an engineered resin that makes it strong and safe.
- Single operator can easily lift and attach the lid.
- Snap fit secures lids and walls with
- Integrated pallet advantages:
 - Eliminates load shifting/coming
 - No nails, splinters or damaged boards
 - No skid overlap to snag when moved
- Self-supporting walls that will not fall and injure operators

Arena 330 Shipper™ System Safety Benefits

Maximize productivity.

Minimize risk.

Air-Evac® Advantages

- Low-to-no manipulation of bag.
- Cassette allows for easy hose attachment and placement in container.
- Decreased residual that eliminates operator manipulation of a heavy bag.
- Blowfish crown cutter:
 - Eliminates the need for sharp edged plunger devices.
 - Decreases spillage that can cause operators to slip-and-fall.

Arena 330 Shipper™ Advantages over Drums

- The Arena 330 Shipper holds the equivalent of six 55 gallon drums in the space of four.
- Less handling and accidents using the A330.
- No rolling necessary, eliminating the difficulty and danger of moving individual drums.
- A330 containers offer superior pallet stability versus drums which can shift during transport.
