

Arena Starfish™ Lift II

Lift up your productivity

Supporting the Arena 330 Shipper's™ high performance

- Ergonomically safe and easy positioning of top discharge pumps, the Arena patented bag wringer and mixers
- It makes attaching the Arena 330 Shipper™ to your process a single person operation, improving productivity and minimizing work disruption
- Once the shipper is in position, the operator can roll the lift right up to the shipper and lower the pump, mixer or wringer into the product
- Telescoping aluminum frame design makes the unit extremely compact, light-weight and versatile
- The winch has a reversible handle for easy storage

For additional information or to try a demo unit, contact Arena Products at 800-836-2528 or email us at: info@arenaproducts.com.

Arena Starfish™ Lift II

Arena Starfish™ II Lift with Air-Evac® Liner

- The lift boom (as shown in photo to the left) is capable of raising a pump or other payload to a height of 122 inches. The pump or payload can then be wheeled back, clearing the 330 gallon Arena Shipper
- The unit is capable of lifting weights up to 350 pounds
- The pump or other payload is easily attached by a quick connect/disconnect locking pin

Arena Bag Wringer Bracket

- The wringer bracket (photo to the right) is designed to attach to the Arena patented bag wringer and allows for ease of placement on the Arena 330 Shipper. The bracket can remain attached while the wringer is in use or disconnected allowing the lift to be used preparing another shipper
- Once the bag is completely discharged, the lift can be used to raise the wringer and bag out of the shipper
