Arena 330 Shipper - Banding Materials

Arena Products recommends placing 2 vertical bands on the 48 sides of the shipper as illustrated below. Banding maximizes the package integrity in abusive environments and provides a secondary means of tamper evidence. We highly recommend using Signode 1822 Tenax ½" Polyester Strapping Part #6200-010355 or equivalent and securing with gritted metal seals. Manual, electric or pneumatic tools as well as handcarts to store strapping and crimps are available.

Information regarding Signode Packaging Systems is available at: 1-800-323-2464 or visit their website at: <http://www.signode.com/na/northamerica.htm>

For Common IBC Loading Patterns, please refer to Technical Bulletin TB018.
