

Arena Blowfish™

Air-Evac®

Liquid Liner

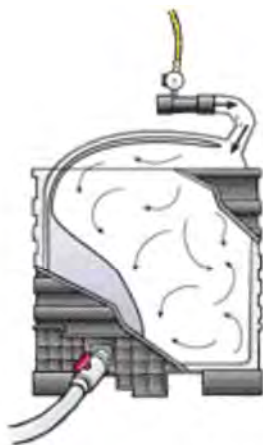

Savings... in the bag!

- Hands-free automatic bottom discharge
- Reduces residuals without labor-intensive wringing, scraping or cleaning
- Air never contacts or contaminates the stored product
- Uses standard shop air
- Tested with a broad range of product viscosities and discharge rates
- Works with Arena 330 Shipper™ and other liquid intermediate bulk containers

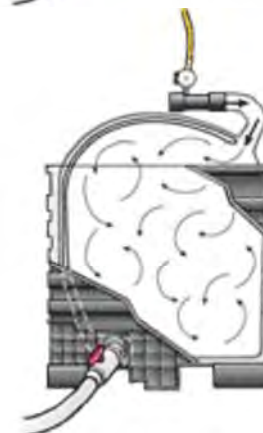

FAST, EASY DISCHARGE

Connect bottom discharge hose, remove the Arena 330 Shipper™ or other container cover. Connect the air regulator to the blue Air-Evac® inflation tube. Turn on the air and walk away.

LINER INFLATION

As product is pumped out, the automatic air delivery system replaces product volume with regulated air, inflating the air chamber in the Air-Evac® bag.

FINAL EVACUATION

When the Air-Evac® bag is fully inflated, the air delivery system shuts off automatically. At this point, the amount of product left in the bag will be at an absolute minimum.

Arena Blowfish™

Air-Evac®

Liquid Liner

Reduce waste. Hands free.

Unique air-injection bottom discharge system offers hands-free discharge. Minimize residuals and eliminate handling for increased product recovery. Easier to manage. Pops up when nearly empty.

Air-Evac™ Blowfish Liner®

- 3-Ply - LLDPE standard
- Food contact per 21 CFR176.170 Conditions D through G
- Kosher
- Casetted with slip sheet
