

Arena 330 Shipper™ System

Customer Focused, Solutions Driven!

Quality IBC Totes

Designed for economy and function, the Arena 330 Shipper™ touts a 3000 lb. liquid (3,500 lb. bulk solid) capacity, making it the largest collapsible plastic bulk container on the market. Its extreme durability and unique build will absorb and flex to withstand the rigors of shipment. Your totes are 100% recyclable, easy to clean, and may require only minimal reconditioning.

Liquid Tote Liners

Available in 1, 2, or 3-ply, tote liners have been designed to safely transport thicker products like mayonnaise, shampoo, or lotion to help you reach a new level of non-hazardous product shipping needs -- no matter the industry. Each liner also has a well-documented record of improving process efficiency, lowering labor costs, and delivering consistent, maximum product recovery.

IBC Pooling Services

Fill it, empty it, forget it. Supply chain simplicity like this is possible due to pooling and logistics that are customized to your distinct industry and shipping time lines. With fully staffed service centers tactically located throughout the U.S. and Mexico, product availability is constant, and based on the rental option you choose, returning freight to filling locations is handled for you.
