The Market's Leading Cheese Shipper Solution

A640 CHEESE SHIPPING SOLUTION

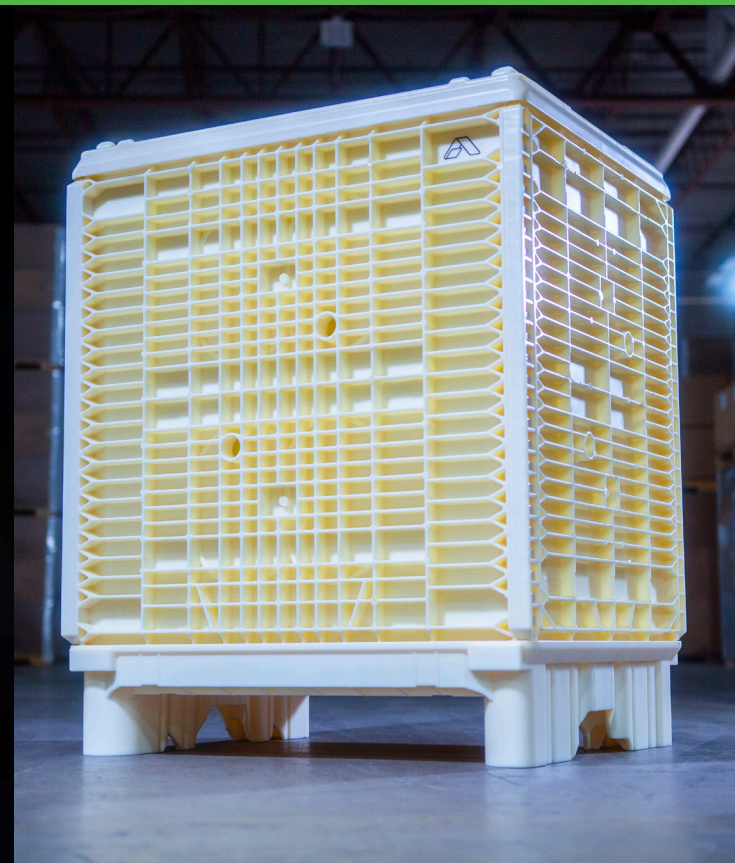

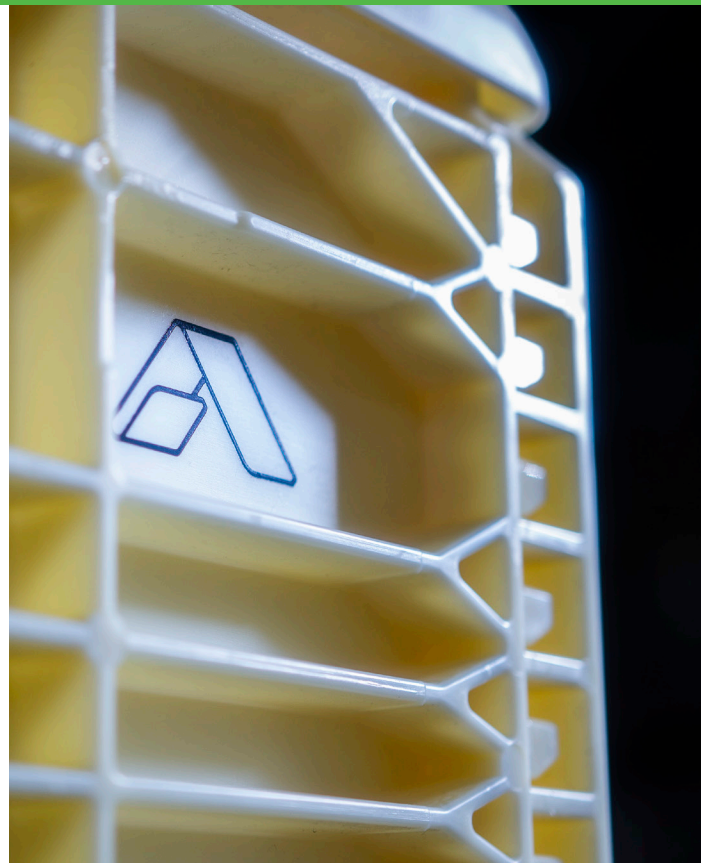

Ease of Use

- A proprietary side-wall interlock system reduces banding

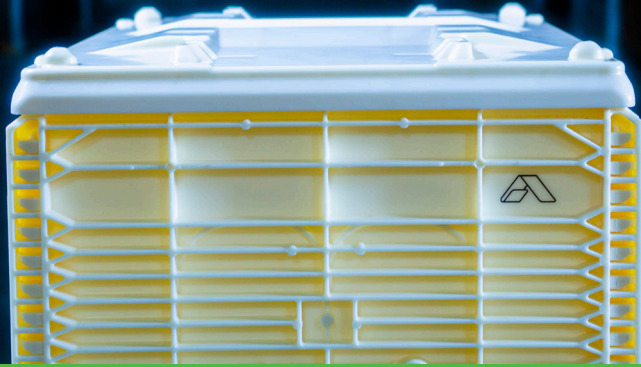

Economic Benefits

- A640's engineered plastic cools product efficiently
- Stiff enough to minimize bowing and trim

A640 CHEESE SHIPPING SOLUTION

The Market's Leading Cheese Shipper Solution

Green Initiatives

- The industry currently stacks A640s up to 6 units high for a reduced storage footprint
- 10% more empty containers per load than wood
- One additional full cheese box per shipment vs. wood

At Arena Products, our roots in the cheese manufacturing industry run three decades deep.

We were the first to collaborate with cheese manufacturers to engineer solutions that freed them from the burdens and limitations of plywood containers.

- Arena A640™ is the most sustainable and cost-effective cheese container on the market
- Patented knock-down design and durable engineered materials are lighter-weight and superior to plywood containers
- Four-side trier access for ease of grading
- 100% recyclable plastic provides USDA-approved application now and into the future

IN-USE DIMENSIONS

Inside: 30" x 28" x 22" | 762 mm x 712 mm x 559 mm
Outside: 37.25" x 30" x 24.5" | 946 mm x 762 mm x 623 mm

WEIGHT

Maximum Fill Weight: 695 lbs. (315 Kilograms)
Tare Weight of Shipper Assembly: 95 lbs. (43 Kilograms)

SHIPPING

Stacking: 4 high when containers are full
Truckload Capacity (53 ft. Trailer): Full — 56
Truckload Capacity (53 ft. Trailer): Collapsed — 446

The Most Reusable, Recyclable, Responsible Bulk Cheese Shipper

- Reduce trim fill between 685-690 pounds for ideal performance and functionality — Capacity up to 700 pounds
- USDA and WDATCP approved
- Reduced banding and lighter-weight components reduce assembly/disassembly fatigue
